Unigrain	Protein concentrate from yellow peas Protein concentrate from faba beans	B2B	Ingredients	VIC	<a href="https://unigrain.com.au/">https://unigrain.com.au/</a>
Wide Open Agriculture	Buntine protein concentrate from lupins	B2B	Ingredients	WA	<a href="https://www.wideopenagriculture.com.au/">https://www.wideopenagriculture.com.au/</a>

CULTIVATED MEAT AND PRECISION FERMENTATION COMPANIES				
Company Name	Technology/Product in development <i>(Not yet approved for sale)</i>	Focus/USP	Company Location	Website
All G Foods	Precision fermentation for animal free dairy	Using precision fermentation to produce high quality animal proteins without the cow. These proteins will be used to produce dairy products that call for high quality whey and caseins.	NSW	<a href="https://www.allgfoods.com/">https://www.allgfoods.com/</a>
Cauldron Ferm	Precision fermentation scale up and manufacturing	Precision fermentation scaling and manufacturing company using a bio-acceleration process (fermaufacturing) to exponentially scale-up any precision fermented prototype to commercial quantities.	NSW	<a href="https://www.cauldronferm.com/">https://www.cauldronferm.com/</a>
Change Foods	Precision fermentation for animal free dairy (cheese)	Using bio-engineering and acellular microbial fermentation to create animal-free dairy products that are lactose and hormone-free.	VIC (HQ: San Francisco, USA)	<a href="https://www.changefoods.com/">https://www.changefoods.com/</a>
Daisy Lab	Precision fermentation for animal free dairy	Using precision fermentation to make dairy proteins.	NZ	<a href="https://www.daisylab.co.nz/">https://www.daisylab.co.nz/</a>
Eden Brew	Precision fermentation for animal free dairy	Using precision fermentation to make nature-identical casein and whey proteins. Focused on the art of making the casein micelle, which is critical to many of the important properties of dairy milk.	NSW	<a href="https://www.edenbrew.com.au/">https://www.edenbrew.com.au/</a>
FytoBio	Molecular farming of ingredients for cellular agriculture	Using plants as biofactories for scalable production of growth factors and recombinant proteins. These make the media for cellular agriculture scalable and affordable.	ACT	<a href="https://www.fytobio.com/">https://www.fytobio.com/</a>
Heuros	GM-Free, animal component-free growth factors to make cultivated meat	Developing growth factors, medium and other technology for growing mammal and bird muscle cells for cultured meat production, with technology that does not use animal products such as serum, genetic engineering, recombinant growth factors, pluripotent stem cells, steroids or antibiotics.	QLD	<a href="https://www.heuros.com/">https://www.heuros.com/</a>
Magic Valley	Cultivated meat	Cultivated meat using pluripotent stem cells from traditionally farmed animals, with an initial focus on lamb and pork.	VIC	<a href="https://magicvalley.com.au/">https://magicvalley.com.au/</a>
Miruku	Molecular farming for animal free dairy	Using molecular farming to make dairy proteins using oilseed crops to produce dairy protein and fats in their seeds.	NZ	<a href="https://www.miruku.com/">https://www.miruku.com/</a>
Nourish Ingredients	Precision fermentation for animal-free fats and oils	Building tailored animal-free fats that are healthier, more sustainable and cook, smell, and taste the same as animal fats.	ACT	<a href="https://nourishing.io/">https://nourishing.io/</a>
Opo Bio Aotearoa	Cultivated cell lines	Cell line development for cultivated meat production as an input for product development.	NZ	<a href="https://www.opobio.com/">https://www.opobio.com/</a>
Vow Food	Cultivated meat	Cultivated meat called "Cultured quail" as a food ingredient currently before food regulators including FSANZ. A curated range of tasty, meat options with different flavour profiles.	NSW	<a href="https://www.vowfood.com/">https://www.vowfood.com/</a>

### **About this directory**

This directory provides a list of all plant-based meat manufacturers, plant protein ingredient companies, and cellular agriculture companies (cultivated meat, precision fermentation and molecular farming) with operations in Australian and New Zealand.

See a gap? If you represent a company of this kind with staff and infrastructure in Australia or New Zealand, please get in touch with information for inclusion in this directory.

Coming soon: a web-based form you can use to submit up-to-date details for the next directory, updated every six months.

We'd love to hear your feedback on categories, available options, suggestions for improvement, and way of working with Food Frontier. Please contact us: [info@foodfrontier.org](mailto:info@foodfrontier.org)

### **Who is Food Frontier?**

Food Frontier is the independent think tank on alternative proteins in Australia and New Zealand. We're committed to growing our region's protein supply with new, sustainable and nutritious options that create value for farmers, businesses and consumers. We help businesses, policymakers and innovators across our region to understand the emergence of plant-based meat, precision fermentation and cultivated meat, and unlock the economic, environmental, and public health benefits they offer. Our work is funded by grants and donations.
